

Pro bike components

ACROS defines its products in terms of quality and durability, not least because its bearings are entirely “rider-proof”, keeping out cleaning detergents and pressure washes so riders can keep on riding. If it’s high quality components that you demand, ACROS can supply the most advanced bottom brackets, hubs headsets and pedals using their in-house specialist bearings. The range is complimented with bars, stems and grips, not forgetting the wheels. This German engineering company’s cycle-centric staff develop some great technical components that give customers the longevity and reliability you would expect from a premium brand.

ACROS

Lightest and most durable chains

Oxford is proud to be the UK distributor of **TAYA** chain, a world leader in chain technology with patents which include Diamond Hard Technology which increases durability by up to 25 per cent in comparison with its competitors. The Alloy Grey 11 and 10 speed ultra-light chains are the lightest in the market at 238g and still deliver over 3000km without showing significant wear, ask for TAYA chains at your Oxford dealer.

Essential rider equipment

Most cyclists will recognise the **Oxford** name in conjunction with top quality security products and the company still offers a huge range of U-locks, chain and cable locks an name in conjunction with top quality security products and the company still offers a huge range of U-locks, chain and cable locks and ground anchors. However, the company boasts a comprehensive range of parts and accessories. Its lighting range covers everything up to 500 lumens’ output; its helmet range includes everything from children’s characters, through BMX and skate styling to aerodynamic road racing; its luggage offers all styles and price points, from traditional to the latest waterproof technology.
