

Come & inspect CUBE's newest range of bicycles, clothing and accessories at Stand J51.

## Enjoy the ride

CUBE's new Teamline collection is as technologically advanced and comfortable as never before. Streamline material enhances the aero dynamical flow and the CUBE V-Shape guarantees maximum freedom of movement and stability. Made from high-quality Italian fabric that improves wind resistance. The bib shorts guarantee top performance with outstanding comfort. Durable, wear resistance fabric is breathable and quick-drying. The mesh back insert helps to maintain an optimum body temperature.

## Technical multi-sport series

The AM Series clothing is made of water and wind resistant, durable functional fabric and protects against wind and cold. Well thought-through technical features such as a lateral ventilation system and easily reachable pockets make these garments extremely versatile – preparing you for all conditions, be it a cross country route or an alpine tour. For more information on CUBE and her products please check [www.cube.eu](http://www.cube.eu)

## CUBE Women Series

CUBE also invests in the development of women's cycling wear.

Our Natural Fit principles ensure ergonomic fit, especially for rider contact points. As men and women are built differently, they demand different things for optimal ergonomics. CUBE features these principles in frame design, component selection and clothing and accessories.

From helmets to gloves and from jerseys to backpacks – it's all in CUBE's accessory line.
